

Bluewater Council to Review Facilities--- Seeks Your Input!

Council has identified a need to examine the current and future use of several buildings. Comments received from groups and the general public will be used in its decision-making process, and the priorities it needs to work on over the next few years. The Municipality owns, operates and maintains in excess of 30 buildings and facilities. With large investments of tax dollars needed to bring the facilities into compliance for accessibility legislation, Council is seeking input from the public on future needs. Information relating to the review is posted on the Municipal website (www.town.bluewater.on.ca), available for review at the Municipal Office, and at the local libraries. Please take time to complete the questionnaire on the use of these buildings. We would be pleased to receive your comments on this form or by fax/email. A review committee is meeting with current user groups of those facilities and will discuss the matter in an upcoming Council meeting. Please add additional sheets should you need to include additional comments.
